THE CONCEPT

ELON RACE

Arcade racing in Decentraland.
Community-built tracks.
A season you can wear.

LOW POLY RETRO

MULTIPLAYER

Master the racing line, combine boost and thrusters, and tackle upside-down sections. Build a track, host a tournament or progress through ranked to earn wearables.

3-5 MIN
target race length

20
S01 wearables

Existing foundation: driving and tracks. Proposed systems: editor, tournaments and seasons.

THE EXPERIENCE

EASY TO START. HARD TO MASTER.

Equal car performance for everyone. Skill decides; wearables are cosmetic.

01

FIND YOUR LINE

Brake, find the racing line and carry speed through the corner.

02

MANAGE CHARGE

Spend charge on boost or save it to correct a jump.

03

TAKE THE LEAP

Jump, roll in mid-air and conquer upside-down sections.

THE CORE LOOP

PRACTICE → COMPETE → PROGRESS → EQUIP → SHARE

CONTROLS

WASD	W W	SPACE	E	F
Drive	Boost	Thrusters	Air roll	Respawn

TRACK EDITOR

BUILD YOUR RACE. PIECE BY PIECE.

Pick modular road sections, snap compatible connectors together, then test and publish.

01

ASSEMBLE

Place straights, corners and slopes. Duplicate and rotate modules in 3D. Connectors align their position and orientation.

02

ADD THE CHALLENGE

Place barriers independently on each side. Add checkpoints, charge pads and marked jump or gap connections.

03

TEST AND PUBLISH

Check joints, clearance and safe respawns. Complete a server-validated lap. Published versions remain locked.

THE CREATOR LOOP

PICK PIECES → SNAP & ROTATE → DECORATE → DRIVE & CHECK → PUBLISH

Track data stores piece versions, transforms and connections. Client and server build matching geometry; ranked uses curated track versions.

COMMUNITY GENERATED CONTENT

STRAIGHTS. CURVES. A THIRD DIMENSION.

IN-WORLD TRACK EDITOR

Players build tracks inside Decentraland with these pieces, then share them with the community.

ROAD + BARRIERS

Open road sections with separate matching left and right barriers.

3D MODULES

Vertical arcs, twists and tubes extend the catalog. Loops need clear entry and exit connections.

Concept reference. New 3D pieces and surface adhesion require implementation and driving tests before release.

ENVIRONMENT KIT

GIVE EVERY TRACK ITS OWN IDENTITY.

ROADSTER / LOW-POLY ENVIRONMENT KIT

Buildings · Nature · Trackside props · Media

01 BUILDINGS

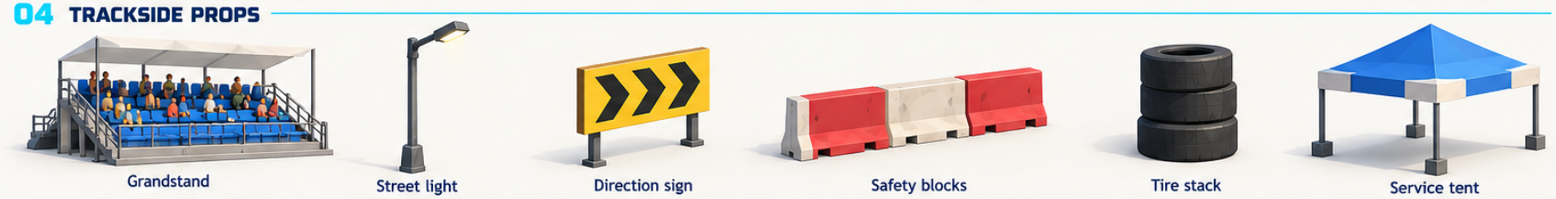

02 TREES & PLANTS

03 ROCKS & LANDSCAPE

04 TRACKSIDE PROPS

05 MEDIA & DETAILS

Visual concept for asset review. Shared materials, reusable modules, simplified collision proxies.

Geometry and textures still require production modeling and performance validation.

BUILD THE WORLD

Buildings, garages, trees, rocks and landscape modules create a coherent low-poly setting.

SET THE STAGE

Grandstands, signs, safety props, screens and banners give community events a distinct setting.

Visual asset reference. Shared materials, simplified collisions and performance validation guide production.

THE COMPETITION

RANKED & TOURNAMENTS. PICK YOUR RACE.

OFFICIAL SEASON

RANKED

Asynchronous challenges against recorded benchmarks: compete even as the very first player.

Three daily tracks. Your best result on each earns 1 to 4 points. Improving it awards only the difference.

No car-to-car collisions. The server validates times and checkpoints.

COMMUNITY EVENTS

TOURNAMENTS

Communities choose tracks, dates, laps and public or invite-only access.

Initial format: asynchronous time trials on 1 to 5 tracks. The lowest combined best valid times win.

Rules and track versions lock when the event opens. Event prizes are separate from ranked rewards.

42 days per season

12 daily point cap

315 points: final wearable

S01 proposal: cumulative points, no demotion. Initial benchmarks are clearly labeled as game reference times.

THE REWARDS

CLUB CIRCUIT / 20 WEARABLES

Retro low-poly clothing and accessories that share the palette and shapes of the game world.

15 ACCESSORIES

Caps, shades, helmets, headphones, watches, a wristband and gloves.

5 CLOTHING & FOOTWEAR

A tee, shorts, sneakers, a varsity jacket and a jersey.

10 LEGENDARY
100 per design

5 EXOTIC
50 per design

4 MYTHIC
10 per design

1 UNIQUE
Winner Cap: 1 copy

Unique Winner Cap: first validated unlock at 315 points. Other rewards subject to stock. No driving advantages.
